

Topic: RAG (Retrieval Augmented Generation)

Takeaways:

- RAG means combining search + Generation of Answers
- RAG improves LLM performance
- RAG reduce hallucinations and improve accuracy
- RAG fetches relevant external data/knowledge before answering.
- RAG flow: User question → Embedding → Vector Store → Retriever → Embedding LLM → Generate Answers → Provide final answers
- RAG Type like Self RAG, Corrective RAG, Fusion RAG, Advanced RAG, Speculative RAG

Summary:

- RAG empower AI with ability to retrieve, verify, generate smarter, accurate answers from digital records or data.
